

DOIC

Digital Open Innovation Campus

DOIC is a global ecosystem building project that aims to create open innovation in industry, academia and government through the Expo 2025 OSAKA, KANSAI, JAPAN

This is not a project targeting only the Expo, but we will continue and expand this ecosystem even after the Expo, contributing to the solution of social issues around the world.

Theme Week and Symposiums

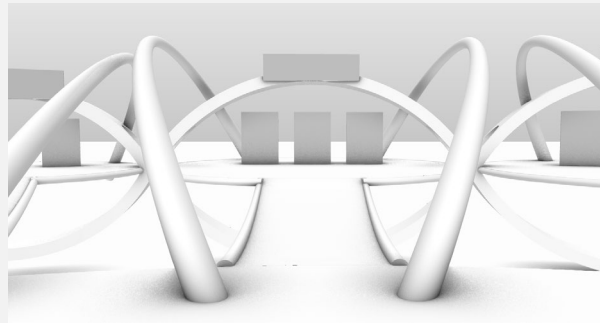

Theme weeks are set up to address important social issues such as decarbonization and poverty in developing countries.

Participants will collaborate with local communities and stakeholders to discuss how to solve the issues before the symposium, and **present proposals for solving the issues** at the symposium.

*There is a selection process for participation.

DOIC Metaverse EXPO

You can share your technological seeds with the world in Metaverse. We connect the main Expo site and satellite sites in real time.

A space will be set up in the Metaverse to exhibit "content" from research institutes and companies. The exhibits will be categorized into four themes, which will be linked to the theme week.

Number of Screens Exhibited^{*1}

- The entire organization: 3 screens
- Specific institution or research center: 2 screens
- Individual research laboratory: 1 screen (Please prepare digital contents to be displayed)

Meet-up events

1. Meetups at Metaverse Space (about once a month)
2. Social events and commemorative ceremonies (before the Expo, after the Expo, one year after the Expo, and periodically thereafter)
3. Premium events inviting overseas VIPs (3 times in total: before, during, and after the Expo)

*Eligible for participating in 1 and 2.

*There is a selection process for participating in 3.

How to participate in DOIC

Exhibition

Academia University,
Research Institution

Free of charge in principle

Entry from here ↓

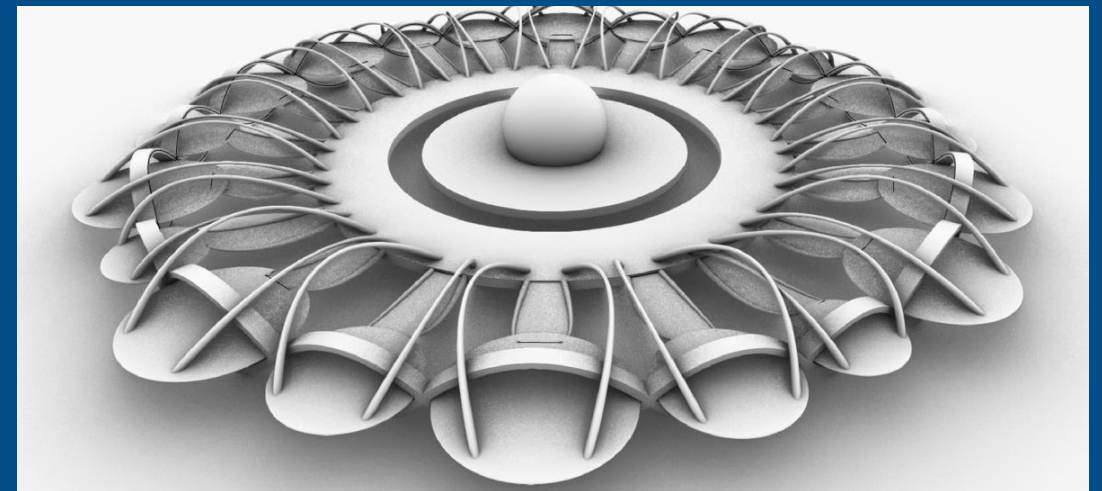

*You can participate only by providing digital content to be displayed.
Please note that there is a screening process for participation.

Sponsorship

Participate as a sponsor

You can join at any time!

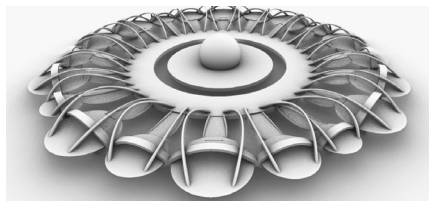

By joining DOIC, you will have the opportunity to "showcase technology to the world" at the EXPO and establish a "foundation for industry-academia collaboration" by connecting with companies from Japan and abroad participating in DOIC.

Significance and benefits of participation

Showcasing technology to the world

~Contributing to solving social issues~

- **World's biggest "international trade show"**
- The Metaverse exhibition venue/symposiums (online)
→ **Companies around the world gain access to research institutes without visiting Japan**

Networking with companies from Japan and abroad

- Strengthening "relationships with participating companies and research institutes from Japan and abroad" (Networking with academia with next generation technologies such as VR/AR/Blockchain)
→ **Meeting new research partners**
- **Collaboration projects with researchers from different universities**
→ **Accelerating research/establishing support systems**

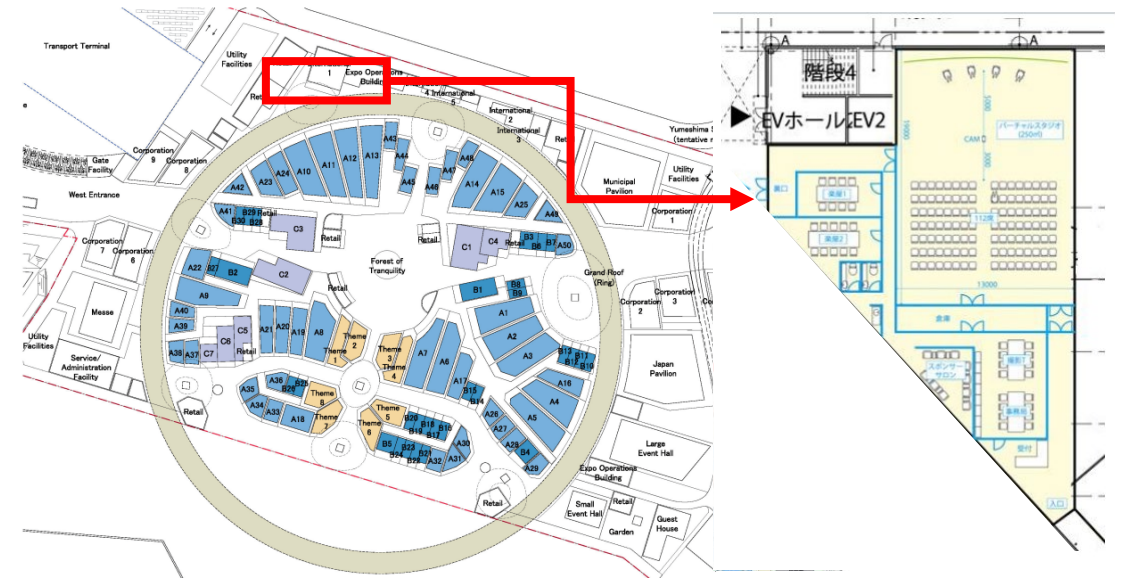

Showcasing technology to the world × Networking with companies

EXPO 2025 ▶ Theme-Week

We will participate in the Theme-Week (Track3) held during the Expo. We plan to have sessions with world leaders on the future of the Earth and biodiversity.

Theme	地球の未来と生物多様性 The future of the Earth and biodiversity
